ELSEVIER

Volume 205, Numbers 1–2, April 1997

WEAR

Contents

Wear mechanisms in reciprocal scratching of polycarbonate, studied by atomic force microscopy 1
A. Khurshudov, K. Kato

The effect of test temperature on the particle erosion performance of titanium aluminide alloys 11
R.L. Howard, A. Ball

Boundary lubrication of an aluminum alloy by tribopolymerization of a monomer under a fretting contact condition 15
Y. Wan, Q. Xue

A central film thickness formula for elastohydrodynamic lubrication of cylinders with soft incompressible coatings and a non-Newtonian piecewise power-law lubricant in steady rolling motion 20
M. Hlaváček

Structural changes after cavitation erosion for a Cr–Mn–N stainless steel 28
F. Wantang, Z. Yangzeng, J. Tianfu, Y. Mei

A model for erosion at normal impact 32
D. Chen, M. Sarumi, S.T.S. Al-Hassani, S. Gan, Z. Yin

Tribochemical wear theory of non-oxide ceramics in high-temperature and high-pressure water 40
S. Kitaoka, T. Tsuji, Y. Yamaguchi, K. Kashiwagi

Surface finish parameters as diagnostics of tool wear in face milling 47
P. Wilkinson, R.L. Reuben, J.D.C. Jones, J.S. Barton, D.P. Hand, T.A. Carolan, S.R. Kidd

The transition of wear mode during the running-in process of silicon nitride sliding in water 55
J. Xu, K. Kato, T. Hirayama

A study of the optimization mechanism of solid lubricant concentration in Ni/MoS_2 self-lubricating composite 64
Y. Wu, F. Wang, Y. Cheng, N. Chen

Tribochemical reactions of dibenzyl and diphenyl disulphides in boundary lubrication 71
S. Plaza, L.R. Comellas, L. Starczewski

The effectiveness of high temperature lubrication by in situ formation of graphite/MoS_2 films 77
Y.S. Jin, C.H. Zhou

Microstructural dependence of friction and wear behaviours in low purity alumina ceramics 88
L. Esposito, A. Tucci

A study of bainitic nodular cast iron for grinding balls 97
W. Liu, J. Qu, F. Lin

Tribology of unlubricated sliding contact of ceramic materials and amorphous carbon 101
A.G. Khurshudov, M. Olsson, K. Kato

On the performance and application of CrN coating 112
Y.L. Su, S.H. Yao

On the initiation of fretting fatigue cracks 120
L.J. Fellows, D. Nowell, D.A. Hills

Ultrasonic in situ continuous wear measurements of orthopaedic titanium alloys 130
M. Long, H.J. Rack

Ratchetting strain experiments with a pearlitic steel under rolling/sliding contact 137
X. Su, P. Clayton

Elsevier Science S.A.

Tribological properties of carbon- and nitrogen-implanted Si(100) 144
P. Kodali, M. Hawley, K.C. Walter, K. Hubbard, N. Yu, J.R. Tesmer, T.E. Levine, M. Nastasi

An analytical observation of the tribochemical reaction of silicon nitride sliding with low friction in aqueous solutions 153
T. Saito, Y. Imada, F. Honda

Wear of cermet cutting tools coated with physically vapour deposited TiN 160
S. Novak, M. Komac

The effect of plume divergence on the spatial distribution and magnitude of wear in gas-blast erosion 169
P.H. Shipway

Wear behavior of anti-galling surface textured gray cast iron using pulsed-CO_2 laser treatment 178
D.I. Pantelis, G. Pantazopoulos, S.S. Antoniou

Research on the wear characteristics of hypereutectoid steel 186
E. Marui, N. Hasegawa, H. Endo, K. Tanaka, T. Hattori

Fatigue wear mechanism of alumina, simulated by synchronized biaxial repeated indentations 200
K.-Y. Lee, K.C. Ludema

The effect of accelerated material removal on roundness and residual stresses in ceramic balls 206
T.A. Stolarski, S. Tobe

Improving the surface behaviors of bearing by adding rare-earth Er implantation 214
J.C. Jin, H. Jin, M. Sakai, C.L. Wu

Tribological behaviour of plasma and laser coated steels 220
J. Khedkar, A.S. Khanna, K.M. Gupt

Comments on the wear mechanisms of impregnated diamond bits 228
M.Es. Abdel Moneim, S. Abdou

Friction in two-body abrasive wear of a WC–Co composite by SiC 231
J. Larsen-Basse

Preparation of ultralow-friction surface films on vanadium diboride 236
A. Erdemir, M. Halter, G.R. Fenske

The effect of load on the structure and wear of friction pair materials (example of low-carbon steel and copper) 240
I.I. Garbar

Erratum 246
